VOCABULARY BUILDER 1

Improve your vocabulary and your test-taking skills with these graded questions on synonyms and antonyms—the most common type of vocabulary questions on IQ and aptitude tests. Ten lessons plus a final test: a total of 400 questions, 2000 words.

VOCABULARY BUILDER 2

This course on synonyms and antonyms is structured like **Vocabulary Builder 1**, but uses a more advanced word list. Ten lessons plus a final test: a total of 400 questions, 2000 words.

The programs in PDI's Hi-Tester Series are especially valuable in preparing high school students for the SAT and other aptitude tests.

HOW TO WIN THE SAT GAME

Taking the Scholastic Aptitude Test (SAT) isn't usually thought of as being like a game; but it should be, because it comes down to a battle of wits that's won as much with strategy as with "facts".

"Preparing For The SAT and Other Aptitude Tests" by PDI is a three-way interactive learning system that involves you, your computer and the text, in a process that makes you really SAT-ready.

You will learn:

- How to become a confident, successful test-taker from now on.
- How test-makers think and what tests *really* measure.
- Why cramming doesn't help and why playing with puzzles does.
- Why and how to skip questions and increase your score.
- How to find the questions you can answer in a snap.

Once you've learned these tips and more — it's on to training in specific parts of the SAT procedure. Not only will you get all the practice you'll want from the programs. you'll also gain a thorough understanding of the principles *behind* the problems.

"Preparing For The SAT" contains the following:

- **Taking Aptitude Tests** — a program that demonstrates what to expect and not expect from the SAT.
- **Making The Grade** — a valuable guide to the world of test-making and test-taking. Includes strategies for many types of tests.
- **A Course Book** which complements the computer programs.
- **Vocabulary Builders** — two courses that help develop your verbal skills.
- **Analogies** — examples of many types of analogies and how to find their "keys".
- **Number Series** — theory and practice in supplying the missing numbers.
- **Quantitative Comparisons** — a review of mathematics from elementary arithmetic through algebra and plane geometry.

Packaged in a sturdy, attractive storage case, "Preparing For The SAT" is available for ATARI® 24K Disk (Cassette and Joystick), 16K Cassette and Joystick and Apple™ 32K Disk and Cassette
